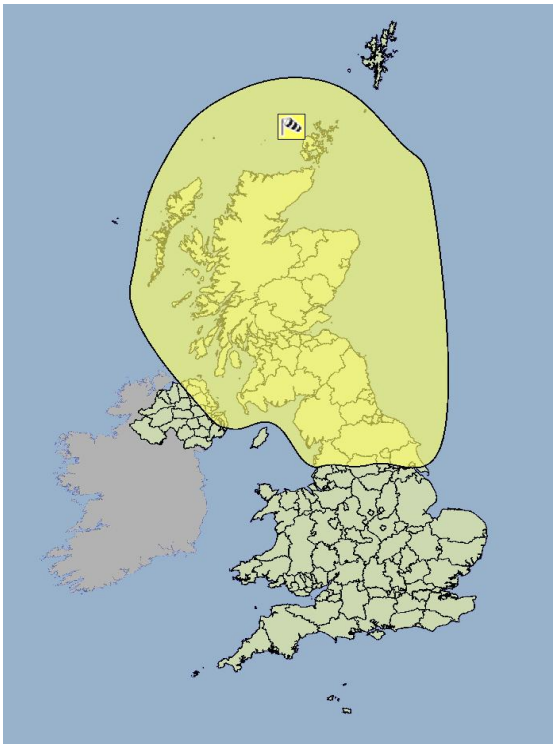
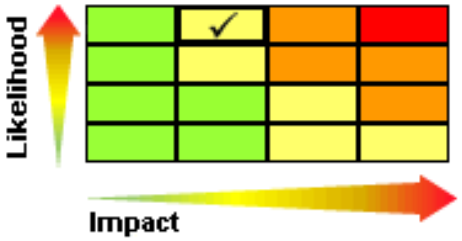
National Severe Weather Warning Service





Chief Forecasters Assessment
Winds are expected to strengthen across northwestern areas on Sunday evening with a swathe of gale force winds expected to cross many northern parts of the UK during Monday. Gusts of 50-60 mph are likely to develop quite widely, with gusts of 70 mph possible over parts of northern and western Scotland and more locally over high ground elsewhere. Winds are expected to peak across western Scotland in the early hours of Monday and through the Central Belt of Scotland during Monday morning's busy travel period. The strongest of the winds should gradually become confined to northeast Scotland by late evening.

In addition, frequent heavy showers are likely to affect parts of western and northern Scotland.

This warning has been updated to include more of northwest England whilst the likelihood in the risk matrix has been elevated.

The Met Office have issued a **Yellow Warning** of **Wind**

Valid from **00:05 on Mon, 02nd Oct 2017** until **23:55 on Mon, 02nd Oct 2017**

Strong west or northwest winds are likely to affect northern areas of the UK on Monday.

Some delays to road, rail, air and ferry transport are likely. Some bus and train journeys may be affected with some journeys taking longer. Delays for high-sided vehicles on exposed routes and bridges are likely. Some short term interruptions to power supplies are possible.
